SUMMARY

Full Stack Developer (MERN) and 2025 IT Graduate. Specialized in building scalable web applications using **MongoDB, Express.js, React, and Node.js**. Experienced in integrating AI-driven backends with modern React frontends. Proven ability to handle both technical IT infrastructure and end-to-end software development, from database schema design to responsive UI implementation.

EXPERIENCE

On The Job Training

Negosyo Center, LGU Santa Cruz

February 2025 - May 2025, Santa Cruz

- Digitized and audited **100+** local business records for the LGU database, improving data accessibility for staff.
- Performed data entry, formatted reports, and used productivity software.
- Optimized digital workflows by collaborating with staff to implement more efficient system-based administrative tasks.

On The Job Training

Ilocos Sur Polytechnic State College (Tagudin Campus)

April 2023 - June 2023, Tagudin Campus

- Helped maintain stable workstation performance by resolving 20+ hardware/software issues weekly
- Streamlined tracking efficiency by documenting system processes and organizing a database of institutional IT assets.
- Troubleshoot hardware and software failures for internal users, ensuring rapid recovery of critical campus operations.

PROJECTS

DEVDOCS AGENT — Local-First RAG Engine

<https://github.com/Allarezeroes26/DevDocs> • May 2026

Tech: React, Next.js, FastAPI, Python, LangChain, ChromaDB, TailwindCSS.

- Developed a document-assistant platform featuring a **React-based** frontend and a Python-powered AI backend.
- Managed persistent UI state using **Zustand** and designed a responsive interface with **TailwindCSS** for seamless document interaction.
- Connected the frontend to a high-performance API to handle real-time semantic search and PDF processing.

LEAD INTELLIGENCE SYSTEM — Predictive CRM

<https://github.com/Allarezeroes26/Lead-Scoring-System> • April 2026

Tech: React, Next.js, Node.js, Python/FastAPI, ShadCN, NumPy, Pandas.

- Built a predictive dashboard using **Next.js** and **Node.js** to visualize customer conversion data.
- Implemented data visualization components using **ShadCN** to display model weights and conversion probabilities.
- Created a structured data pipeline to feed ML inference results into a clean, user-facing React interface.

EDUCATION

Bachelor's Degree, Information Technology

Ilocos Sur Polytechnic State College • Tagudin Campus • 2025 • 1.89 GPA

AWARDS & HONORS

International Student Exchange Excellence Awardee

Ilocos Sur Polytechnic State College • 2025

SKILLS

Frontend: React.js, Next.js, Zustand, TailwindCSS, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, FastAPI (Python), REST APIs

Tools/DevOps: Git, GitHub, Heroku, Google Workspace, Office 365, Postman, Data Visualization

IT Foundations: Hardware/Software Diagnostics, System Auditing, Technical Documentation
